Thriving In Uncertainty

This two-day workshop is designed to help you and your organization successfully navigate and thrive, even in the midst of current economic challenges. It will prepare you to act with courage and clarity in environments of uncertainty. Based on principles of chaos and complexity, and rooted in the practical wisdom of human system dynamics, this interactive workshop invites you to practice what you learn as you wrestle with your own "wicked issues" during the workshop. You will gain practical tools and methods that you will be able to apply immediately in your own work environment.

Through exercises that engage diverse learning styles, you will learn to

- Recognize predictable, unpredictable, and emergent situations and learn how to adapt your actions to each
- Use a variety of tools and methods to see, understand, and influence patterns in surprising situations
- Apply new tools to old issues as well as the new challenges of an uncertain world
- Develop and implement an adaptive action plan to respond to your most challenging situations

This workshop includes an experiential learning component. We will use creative process to embed new concepts and provoke fresh insights. Come prepared for engagement, learning and surprise!

Location

Halifax, Nova Scotia

Course Fee: \$800

Meeting Times

March 1, 1:00–6:00

March 2, 9:00–5:00

March 3, 9:00–12:00

The Goal

Prepare leaders to see, understand, and influence the complex dynamics of uncertain environments, including markets, social systems, politics, emotions, and organizations.

By the end of the session participants will be able to:

1. *Recognize the differences among predictable, unpredictable, and emergent situations and adapt their actions to respond to these dynamics.*
2. *Use a variety of tools and methods to see, understand, and influence patterns in surprising situations.*
3. *Apply new tools to old issues and the new challenges of an uncertain world.*
4. *Develop and implement an adaptive action plan to respond to their most challenging situations.*

Each participant will be encouraged to bring at least one sticky issue to address in the course. In a workshop environment, each of the concepts and tools will be immediately applied to help each leader see, understand, and influence their own uncertain situations.
